

UZ-1

FILTER USAGE & CLEANING

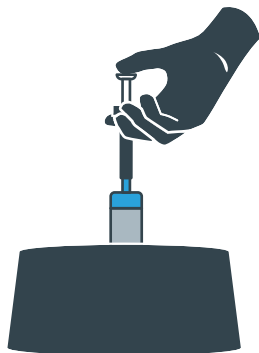

The UZ-1 is simple to use. Just pour water into the top bucket with the filter attached, and it will begin filtering into the lower bucket. To clean the filter, follow the procedure below.

- 1** Remove top bucket with attached filter and take outside, away from people

- 2** Turn bucket upside down

- 3** Back wash filter using only clean water and syringe until water runs clear

- 4** Re-stack buckets and return to normal use

** Clean your filter as needed and after every use.*
